

Product Portfolio

As the data governance company, erwin provides **enterprise modeling, data cataloging** and **data literacy** software. Together, these products comprise the **erwin EDGE** platform for an “**enterprise data governance experience**” that facilitates strategic collaboration between IT and the business for data-driven insights, agile innovation, risk management and business transformation. With data governance as the hub and driving principle, the enterprise and its critical data and business architectures are connected so data assets can be discovered, understood, governed and socialized to **reduce risks** and **realize the desired operational results**. Only when data governance is everyone’s business can potential and value be unleashed and maximized.

erwin Business Process

Business process modeling and analysis software powered by Casewise for visualizing system interactions, business processes and organizational hierarchies. Shine a light on areas ripe for innovation, improvement or reorganization.

erwin DM NoSQL

Extension of erwin DM and the only enterprise-class data modeling software with native support for Couchbase and MongoDB NoSQL database platforms. Model and manage unstructured data as effectively as traditional data sources.

erwin Enterprise Architecture

A complete set of on-premise enterprise architecture tools powered by Casewise that is highly customizable for integration into the customer environment. Plan, manage and respond to change while driving digital transformation with all information and artifacts in one place.

erwin Data Catalog Suite

Automated metadata harvesting, data cataloging, code generation and data lineage software with data mapping, reference data management, lifecycle management and data quality capabilities. Efficiently integrate and activate data within a single, unified catalog for successful and sustainable data governance, data quality and metadata management initiatives.

erwin EA Agile

A full-featured, cloud-based set of enterprise architecture tools with out-of-the-box support for such industry platforms as TOGAF® and ArchiMate® 3.0. Translate strategic goals into a blueprint of IT capabilities quickly and cost-effectively with no hardware to implement or manage.

erwin Data Literacy Suite

Includes the erwin Business Glossary Manager and erwin Business User Portal so stakeholders can view data relevant to their roles and understand it within a business context. Ensure your organization is fluent in the business language of data to make it really work.

erwin Data Modeler

The world’s most trusted data modeling software with visual design and documentation capabilities for any data from anywhere across an organization. Increase the use, understanding and trust of data across the enterprise.

erwin Data Intelligence Suite

Combines the capabilities of erwin Data Catalog and erwin Data Literacy for data visibility, control and enterprise collaboration with role-based access and views. Spend less time searching for data and more time analyzing it for smart insights and peak performance.
