

# Master Data Management Project Jump-Start

## Estimated Time

- 4 Weeks

After years of working with companies to implement Informatica Master Data Management, Pacific Data Integrators (PDI) has developed our Project Jump-Start Service Offering.

The purpose of this service offering is to expedite your MDM project by fast-tracking the discovery and planning process. If you are looking to lay a strong foundation

## Qualification

### Notice

PDI's Project Jump-Start offerings are limited to the latest version of the software, along with a specific version of operating system, application server, and database software.

for your MDM initiative, then this service offering was designed for you and your team.

Our MDM service package provides clients with professional guidance to jump-start the requirement discovery, project design, and configuration steps that occur at the beginning of all MDM initiatives.

Our professionals have years of experience with Informatica Master Data Management and are always up to date on Informatica's latest product versions and trainings.

Our consultants will assist your team in laying out the business and technical requirements, understanding the tool, and outlining an implementation plan that is attuned to your business objectives.

### **This engagement will focus on:**

- Outlining the required production environment infrastructure capacity
- Creating a high-level architecture of how INFA MDM will be implemented in your environment
- Designing a detailed plan for the Design, Development, Testing, and Deployment Phases of the MDM implementation
- Creating a staffing proposal to provide your team with consultants to support key areas of your initiative

## **Key Program Deliverables:**

- High-Level Review of Requirements
- Development of High-Level Conceptual Architecture, Detailed Implementation Plan, Staffing Plan, and Implementation Proposal
- Determination of Prerequisites and Production Hardware Sizing Requirements
- Review of Project Goals
