

Data Governance Project Jump-Start

Estimated Time

- 4 Weeks

After years of working with companies to implement Data Governance projects, Pacific Data Integrators (PDI) has developed our Project Jump-Start Service Offering.

The purpose of this service offering is to expedite your Data Governance project by fast-tracking the discovery and planning process. If you are looking to lay a strong foundation for your Data Governance initiative, then this

Qualification

Notice

PDI's Project Jump-Start offerings are limited to the latest version of the software, along with a specific version of operating system, application server, and database software.

service offering was designed for you and your team.

Our Data Governance service package provides clients with professional guidance to jump-start the requirement discovery, project design, and configuration steps that occur at the beginning of all governance initiatives.

Our professionals have years of experience with Informatica tools and are always up to date on Informatica's latest product versions and trainings.

Our consultants will assist your team in laying out the business and technical requirements, understanding the tool, and outlining an implementation plan that is attuned to your business objectives.

This engagement will look at:

- High-value opportunities for Data Governance projects
- Outlining business drivers and technical capabilities
- The project design, solution strategy, and initiative recommendations

Key Program Deliverables:

- Assessment of current Data Governance practices
- Staffing Plan to support the Data Governance project
- Establish the Data Governance program's structure with a framework and best practices
- Road map to structure the Data Governance program
