

Informatica iPaaS Cloud Project Jump-Start

Estimated Time

- 2 Weeks

The most difficult part of migrating to cloud is often knowing how to get started. In our Cloud Jump-Start Service Offering, our consultants will help you understand what specific steps are involved in moving to Cloud. If you are looking to lay a strong foundation for your cloud initiative, then this service offering was designed for you and your team.

Qualification

Notice

PDI's Project Jump-Start offerings are limited to the latest version of the software, along with a specific version of operating system, application server, and database software.

For more details about Pacific Data Integrators contact us at informat-ica@pacificdataintegrators.com or visit our website at pacific-dataintegrators.com.

Our cloud consultants have years of experience they will leverage as they work to understand and outline your cloud integration needs. We will examine your cloud migration plan and how you expect to leverage the Informatica Intelligent Cloud Services iPaaS platform.

We will work with your team to fully explore the data management requirements that will best support the successful launch of your cloud project.

As a part of this engagement, our team will:

- Identify required integrations and provide an effort estimate regarding the implementation of all desired integration processes
- Validate your planned deployment infrastructure
- Identify potential roadblocks, complete with resolution strategies

Key Program Deliverables:

- Inventory of cloud integrations, including an itemization of integration sources and targets
- Outline of event-based or API-based integration needs
- Identification of the real-time and batch components of the cloud solution
