

Data Security Project Jump-Start

Estimated Time

- 3 Weeks

This Data Security Jump-Start service offering is for companies who are looking to lay a strong foundation for their data security practices. We will examine the existing infrastructure, outline best practices, set you on the path to detecting and protecting your sensitive data, and more.

If you are getting ready to implement an Informatica data security tool and want to get the most out of it, then this service offering is for you and your team.

Qualification

Notice

PDI's Project Jump-Start offerings are limited to the latest version of the software, along with a specific version of operating system, application server, and database software.

Goals

- Establish masking and profiling guidelines
- Outline standards for future enterprise-wide rollouts
- Preparation for the actual data security implementation

Areas of Focus

- Best practices workshop and engagement planning
- Definition of data domain discovery policies
- Environment and architecture recommendations
- Outline team structure and required team members for a successful implementation

Key Deliverables

- Implementation plan for data discovery or data masking
- Establish processes for current and future rollouts
- Create a repeatable strategy for discovering enterprise sensitive data, and an approach for profiling data
- Outline guidelines for identifying and protecting sensitive elements
- Deliver a base implementation plan that includes a project timeline, resources, and hardware/software requirements
